

Plant Information

Common Name: Weeping European Larch

Scientific Name: *Larix pendula*

Plant Type: Tree

Physical Characteristics

Height/Spread: 10-15 meters in height, 4-6 meters in spread

Growth Rate: Moderate

Flower Color(s): Yellow

Foliage Color(s): Bright green turning to golden yellow in the fall

Bloom Time: Spring

Plant Description

Larix pendula, commonly known as Weeping European Larch, is a stunning tree with a graceful weeping habit that adds elegance to any landscape. This moderate-growing tree features bright green foliage that turns a beautiful golden yellow in the fall. It produces yellow flowers in the spring and thrives in full sun with moderate watering. With its low maintenance requirements and attractive appearance, Weeping European Larch is often used as a specimen tree or focal point in gardens. Pair it with dwarf conifers and rhododendrons for a visually appealing garden display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, acidic soil

Water: Moderate Watering

Hardiness Zone(s): Zones 2-7

Maintenance & Care

Maintenance Level: Low

Potential Pests & Diseases: Susceptible to bark beetles and cankers

Additional Information

Special Features: Graceful weeping habit

Common Uses: Specimen tree, focal point in landscaping
