

Plant Information

Common Name: White Bleeding Heart
Scientific Name: *Dicentra spectabilis Alba*
Plant Type: Perennials

Physical Characteristics

Height/Spread: 30-60 cm height, 30-45 cm spread
Growth Rate: Moderate
Flower Color(s): White
Foliage Color(s): Green
Bloom Time: Spring

Plant Description

Dicentra spectabilis Alba, commonly known as White Bleeding Heart, is a beautiful perennial plant that adds charm to any garden with its elegant white flowers. This plant thrives in part shade conditions and requires moderate watering. Its unique white blooms attract hummingbirds while also being deer-resistant. With low maintenance needs, this plant is perfect for garden borders and woodland settings. Pair it with companions like hostas and ferns for a stunning display of contrasting foliage and textures. White Bleeding Heart is a must-have for gardeners looking to add a touch of grace and beauty to their outdoor space.

Optimal Growing Requirements

Sun: Part Shade

Soil: Moist, well-draining soil

Water: Moderate Watering

Hardiness Zone(s): Zone 3-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Slugs, snails, powdery mildew

Additional Information

Special Features: Deer-resistant, attracts hummingbirds
Common Uses: Border plant, woodland garden
