

Plant Information

Common Name: Yucca Color Guard
Scientific Name: Yucca filamentosa 'Color Guard'
Plant Type: Perennials

Physical Characteristics

Height/Spread: 0.9 meters tall and 0.6 meters wide
Growth Rate: Slow
Flower Color(s): Creamy white
Foliage Color(s): Variegated green and yellow
Bloom Time: Summer

Plant Description

Yucca Color Guard is a striking perennial plant with variegated foliage that adds interest to any garden. Its creamy white flowers bloom in the summer, attracting pollinators. This low-maintenance plant is perfect for borders or as a focal point in the garden. With its drought-tolerant nature and deer resistance, Yucca Color Guard is an excellent choice for Canadian gardens, especially in hardiness zones 4-7. Pair this plant with companions like Russian sage or lavender for a beautiful and harmonious landscape.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, sandy soil

Water: Low Watering

Hardiness Zone(s): Zone 4-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Deer resistant, may be susceptible to rot in wet conditions

Additional Information

Special Features: Drought-tolerant, deer resistant
Common Uses: Border plant, focal point in garden
